

## **AMI Appointed New Australian Exclusive Premier Distributor**

Highly experienced in the area of water filtration and sanitation systems, AMI Marine will become the new Australian Exclusive Premier Distributor for Parker Water Purification Systems range of Sea Recovery Reverse Osmosis Watermakers, effective November 7th 2015.

AMI's Australia wide service network will be available to assist with technical and service related support requirements, including carrying the range of spare parts, accessories and consumable items in support of the Sea Recovery range. Additionally, Horizon Reverse Osmosis (HRO) Watermakers Service and Spares will also be available.

Technologically advanced and innovative in their field, Sea Recovery systems boast both compact and modular configurations to suit even restricted interior spaces, and NMEA 2000 compatibility, able to be operated remotely from the vessel bridge or substation with a suitable controller.

Sea Recovery has existing relationships with Australian customers in both leisure, commercial and defence sectors, including prestigious boat builders, due to their compact marine range, and high output modular models for commercial operators.

Water production varies from 32L/per hour for Sea Recovery's most compact leisure model, through to a massive 50,000L/per hour output from their largest commercial unit.

For all Sea Recovery enquiries, or more information about servicing, contact your nearest AMI branch, visit the AMI website on [www.amisales.com.au](http://www.amisales.com.au), or browse the range at the new Australian distributor website for Sea Recovery [www.searecovery.com.au](http://www.searecovery.com.au)
